Why it matters

Eyeball's customers are **analysts, scouts and recruitment specialists** working for elite professional football clubs.

They use Eyeball to search for talented players who they could invite to join their clubs. The search typically starts at the **Eyeball data filter**, which is a powerful tool that the scouts use to identify footballers with specific skills that they admire.

The data filter works across **48 different parameters**, and every game Eyeball's analysis generates data on all the players for these parameters.
